1 Problem

If A and B are two events such that P(A) ≠ 0 and $P(B|A) = 1$, then

A) A ⊂ B
B) B ⊂ A
C) B = ϕ
D) A = ϕ

2 Solution

Given $Pr(B/A) = 1$. By definition,

$$P(B/A) = \frac{P(AB)}{P(A)}$$

$$\implies \frac{Pr(AB)}{Pr(A)} = 1 \tag{2.0.1}$$

$$\implies Pr(AB) = Pr(A) \tag{2.0.2}$$

$$\implies AB = A \tag{2.0.3}$$

Take any X ∈ A. From 2.0.3, since $A \cap B = A$

$$\implies X \in AB$$

is also true.
Therefore, for any X ∈ A , X ∈ B

$$\implies A \subseteq B$$

But, since A and B are two events, $A \neq B$. Hence,

$$A \subset B$$

Therefore, option (A) is correct.
